Bash and All That

Why Ancient *NIX Tools Are Still Essential

Dean Wampler, Ph.D.
dean@lightbend.com
@deanwampler

The UNIX Philosophy

https://en.wikipedia.org/wiki/Unix_philosophy

- Make each program do one thing well

- 
- A close-up photograph of a mechanical assembly, likely a part of a vehicle's suspension or steering system. The image shows several metal components, including a large black cast metal housing on the left and various steel bolts and nuts. The bolts are arranged in a pattern, some with washers. The background is a blurred asphalt surface. The text is overlaid on the left side of the image.
- Expect the output of every program to become the input to another program

- 
- Design and build software to be tried early, ideally within weeks

- Use tools in preference to unskilled help to lighten a programming task

tools...

bash
for scripting

```
#!/usr/bin/env bash
```

```
function error {  
    echo "ERROR: ${1}" >&2  
    usage  
    exit 2  
}
```

```
function usage {  
    cat << EOF > &2  
Usage: $0 [-h] [-j json_file]  
Where:  
-h Show this message and exit
```

```
#!/usr/bin/env bash
```

```
function error {  
    echo "ERROR: ${1}" >&2  
    usage  
    exit 2  
}
```

```
function usage {  
    cat << EOF > &2  
Usage: $0 [-h] [-j json_file]  
Where:  
-h Show this message and exit
```

```
}  
function usage {  
  cat << EOF > &2  
  Usage: $0 [-h] [-j json_file]  
  Where:  
    -h Show this message and exit  
    -j Use this JSON configuration  
        Defaults to "./app.json"  
EOF  
}
```

```
JSON="./app.json"
while [[ $# -gt 0 ]]
do
  case "$1" in
    -h) usage; exit 0 ;;
    -j) shift; JSON=$1 ;;
    *)  error "unexpected option: $1" ;;
  esac
  shift
done
```

```
[[ -f "$JSON" ]] || \
error "Couldn't find the JSON file
$JSON"
```

```
type dcos >/dev/null 2>&1 || \
error "The DC/OS CLI required"
```

```
dcos marathon app add "$JSON"
```

- 
- Low ceremony
 - Pros and cons of “stringly typed”
 - Composability
 - Productivity

LO

- 
- Conceptually simple, powerful
 - ... if Quirky...
 - Strikes a good balance of built-ins vs. user-control
